

Financial Tear Sheet

Corporate Profile

Tokai Pharmaceuticals is a biopharmaceutical company previously focused on developing and commercializing innovative therapies for prostate cancer and other hormonally driven diseases. The ARMOR2 and ARMOR3-SV clinical trials of Tokai's drug candidate, galeterone, for the treatment of metastatic castration-resistant prostate cancer (mCRPC) have been closed, with only patients in ARMOR2 long-term extension continuing treatment at this time. Plans remain in effect to present data from the ARMOR3-SV trial in a scientific forum once fully available and analyzed. Assessment of plans for galeterone, the ARDA platform and Tokai's AR-V7 assay work are underway at this time.
